

Problem Area Map

care of children

Analysis and sub problems

Care of children

Differences compared to the care of elderly

- more activities
- longer activities
- shorter days
- usually five days a week
- activities can be very energetic
- activities can be loud

Possible activities for children

- Structural playing
- Free playing
- Foster movement (dancing, singing)
- Foster creativity (painting, drawing, craft..)
- Excursions to the forest or playground
- Foster social interaction
- Playing cards

Possible activities for the elderly

- Visiting hours
- Walks
- Social interaction (play, sing, sit dance)
- Reading or writing
- Depending on religion mass or prayer times
- Playing cards

Care of elderly

Differences to the care of children

- more free time
- additional nursing and care
- 24 hours a day, 7 days a week

Possibilities for Intervention

Differently structured, but some common ground is:

- external determination
- three meals
- napping time
- activities

As a result, it makes sense to focus on joint activities, as this is where the most interaction can take place.

Intergenerational Interaction Possibilities

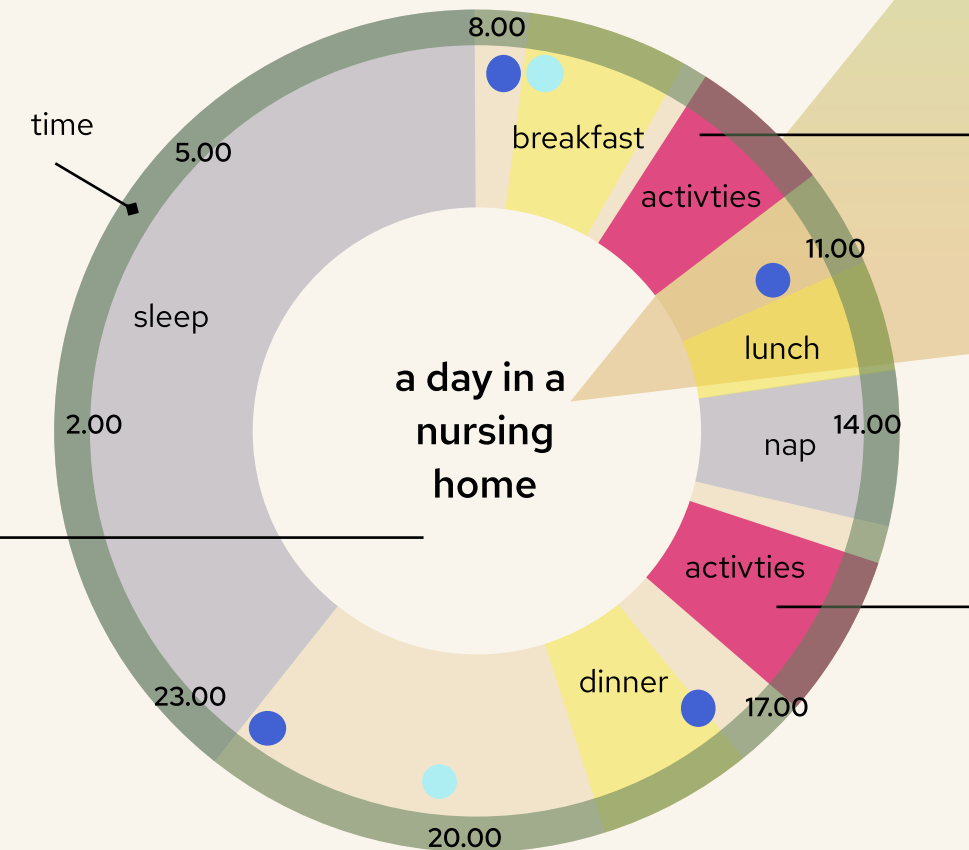

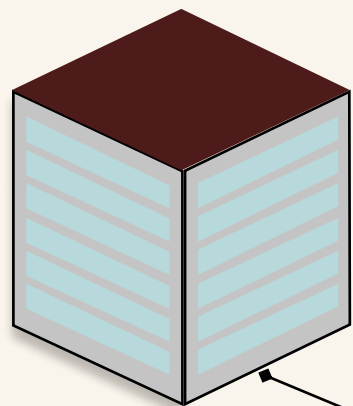

Necessary to consider:

- environment
- atmosphere
- daily mood
- group size
- group dynamics
- willingness of participation

Additionally, a frame/setting/environment must be given so that activities can occur.

Main problem: the two care institutions are mainly disconnected

care of elderly

- Medication intake
- Body care (washing..)
